WRITE BRAIN VIRTUAL IMPACT

After implementation of our Supplemental & Enrichment ELA/ELD + SEL Virtual Program in Santa Ana, California in 2020, the following results were observed by 130 educators:

Educators saw an 86% increase in students' literacy skills.

Educators saw a 94% increase in students' willingness to present and share verbally.

Students at all grade levels engage in fun and authentic S.E.L and shortform creative writing experiences to help them reconnect and recalibrate after the disruption of recent school years.

This colorful and non-intimidating program can be projected on any screen or smartboard in your classroom or program site. Comprising nearly 500 slides full of images and written prompts to inspire students to journal, create rap songs, conduct interviews, craft letters, and much more, our Digital ELA + ELD + SEL Program is designed to help students process, reflect and share, all while building their literacy skills!
